

Project Charter

Project Title

Checkout Process Optimization Project

Company Background

ShopEase is a mid-sized online retail company that sells consumer electronics, fashion products, and household items through its e-commerce platform. The company serves approximately 50,000 monthly customers and generates revenue through online sales

Problem Statement

ShopEase has identified that approximately 49% of customers abandon their shopping carts before completing the checkout process. This issue results in an estimated revenue loss of Rs.56,000,000 per month and negatively impacts overall business performance and customer satisfaction

Project Goal

To identify the root causes of cart abandonment and redesign the checkout experience to reduce cart abandonment by 20% within six months of implementation

Stakeholders

Stakeholder	Role
Marketing Manager	Provides customer behavior insights and campaign data
IT Lead	Oversees technical implementation and system changes
Customer Support Head	Shares customer complaints and feedback
Finance Manager	Measures financial impact and ROI
